RE: Cellular Telecommunications Industry Association's Petition  
for Rule Making

Dear Commissioners:

The City of Nevada City, California, has been informed of the above referenced petition for Rule Making, requesting the Commission to issue a Notice of Proposed Rule Making. The petition proposes to exercise its authority to preempt state and local governments from enforcing zoning and other similar regulations which have the purpose or effect of barring or impeding commercial and mobile radio service providers from locating and constructing new towers.

The City of Nevada City hereby objects to such a petition. The City objects to any rules or regulations which result in the loss of any control in the decisions of placing transmission towers. Nevada City is a small, historic and scenic community that relies on maintaining aesthetics as part of our tourist-oriented economic strategy.

Thank you for the opportunity to comment.

Sincerely,

  
Andrew R. Cassano  
City Planner
